

ATDML Jan 2021 Virtual Crop Class

By Ann Freeman

Kaisercraft Native Breeze

Kit Contents:

- Kaisercraft Native Breeze papers
- 2 x cardstock
- Ephemera pack

I've made three layouts to share with you today using these papers which I hope you enjoy. There is enough scope to change them up a bit and make them your own which I hope you will do.

Layout 1

1. Use the *Wattle Flower* paper as your background – remove the title strip and retain, then orientate the page so the floral element on the paper is in the top left corner.
2. Next cut out a number of the boxes from the *Southern Sky* paper using my layout to guide you. Two of them I removed the centres so they were just a frame, one of which I used to house my photo.
3. Cut a square from the *Native Flock* paper to cover the text on one of the square blocks
4. Arrange your frames and shapes as desired on the page being sure to touch the floral element printed on the background so it is included in the cluster.
5. Add ephemera pieces from your pack as desired.
6. Make your journaling boxes from a strip cut from the edge of the White cardstock which is trimmed to 11½" square for layout 3. Draw a border round these in keeping with the frames on the page.

Layout 2 - Together

1. Take your *Eucalyptus* paper and with the foliage running horizontally across the top trim to 12" wide by 9" tall
2. Add a 12" x 3½" piece of the olive spotty side of the *Pink Protea* paper to the top with the overlap behind the *Eucalyptus* page so you make a 12x12 background from these two pieces.
3. Add the olive /white border strip from one of the papers along the bottom of your page
4. From the *Southern Sky* paper chose a title piece (I used "Together is our favourite place to be") and add this to the top of your page over the join on the two papers, aligned to the left (as shown in the layout image).
5. Then take another border strip (I used the black with flecks one) and add to the left and right of your title (I used the remainder of this border strip on layout 3)
6. Next cut 3 identical sized blocks from the top row of the *Southern Sky* paper and use them to house your photos leaving the frames around the edge – then layer these (landscape orientated) along the top of your page. I added some of the olive dot to my white frame before adding my photo as it stood out too much otherwise.
7. To complete this layout add a couple more strips of white card, with frames drawn on to house your journaling in the bottom right corner of the page along with some more ephemera from your pack.

Layout 3 – Together

1. Add your 11 ½" white card square to the red card in the kit for your background.
2. Using heart punches and/or homemade templates cut a selection of hearts from the papers with drawn borders to help define them. Then layer these down the left of your page along with some hearts drawn directly onto the background.
3. Add your photos as desired, you can either shape these into hearts or add on top – the choice is yours. I mounted one of mine on another of the blocks from the *Southern Sky* paper
4. Add the remaining black with flecks border strip towards the bottom adding the "together" title from the ephemera pack. (I also added "life is a journey" which was trimmed again from one of the border strips)
5. Add a couple more hearts to the right of this strip and add journaling lines beneath.
6. Complete the page with a few heart themed ephemera elements from your pack and some squiggly doodled lines.

I hope you have enjoyed taking this class.
